

Mouldings are a great way to personalize your cabinetry design!

Crown mouldings can be used alone or combined with a variety of other mouldings and fillers to create eye-catching designs. We've put together a number of sample "stacks" to get you inspired, and included a key with Canyon Creek item numbers so you can duplicate the look.

There are a number of different types of mouldings and fillers represented in these designs. Below, you'll find an index of the nomenclature used, along with a drawing of the item. Many of the items can be enhanced with edge details that match the door edge detail – be sure to ask your authorized Canyon Creek distributor for more info.

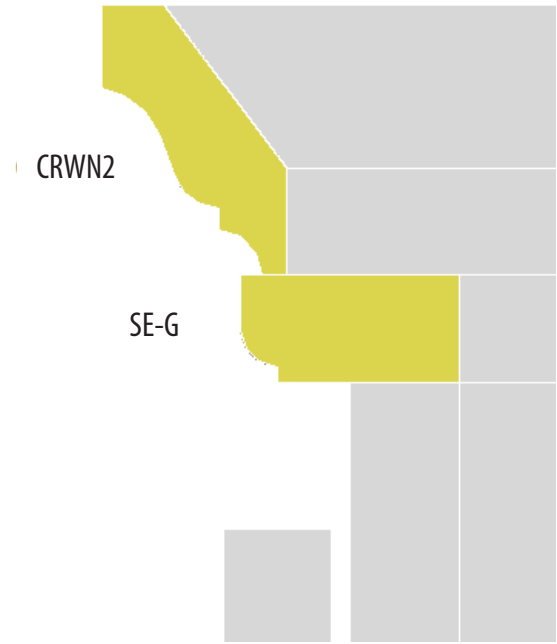

NOTE: When an edge detail has been applied, it will be reflected in the key. For instance, SE-G is Self-Edge with a "G" edge detail.

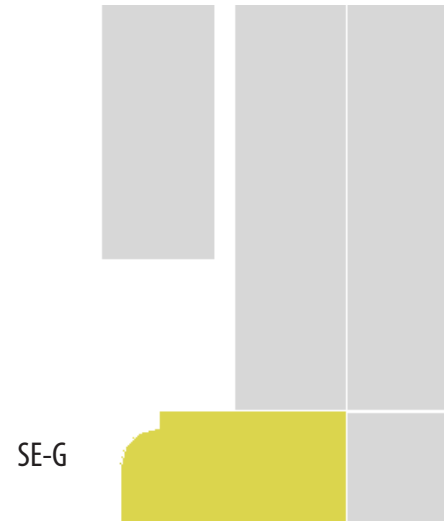

<p>BSP - Backsplash</p>  <p>More edge details available</p>	<p>CAP - Cap Moulding</p> 	<p>COR - Cornice Moulding</p> 	<p>CRWN - Crown Moulding</p> <p>CRWN2</p> 
<p>DM - Dentil Moulding</p> 	<p>ICM - Inside Corner Mldg.</p> 	<p>LV - Light Valance</p>  <p>More edge details available; choose between 1.75" and 2.5" height</p>	<p>MP - Mounting Plate</p> 
<p>MS - Moulding Scribe</p> 	<p>OG - Ogee Moulding</p> 	<p>PR - Plate Rail</p> 	<p>RM - Rope Moulding</p> 
<p>SE - Self Edge</p>  <p>More edge details available</p>	<p>SF - Standard Filler</p> 	<p>To see more Crown Moulding profiles and edge detail options, check out the Cabinet Drawings page of our website, www.canyoncreek.com. From the home page, select Product Information and choose "View cabinet drawings" in either the Cornerstone or Millennia section. The Mouldings & Finishing Touches PDF has all the details!</p>
